A company has 10 portable client computers that run windows 8
The portable client computers have the network connections
described in the following table+

None of the computers can discover other computers or devices,
regardless of which connection they use.
You need to configure the connections so that the computers can
discover other computers or devices only while connected to the
CorpWired or CorpWifi connections.
What should you do on the client computers?
A. Change the CorpWired connection to public. Turn on network
discovery for the Public profile. For the Hotsport connection,
select No, don't turn on sharing or connect to devices.
B. Turn on network discovery for the Public profile
C. For the CorpWired connection, select Yes, turn on sharing
and connect to devices.
D. For the CorpWifi connection, select Yes, turn on sharing and
connect to devices.
E. Turn on network discovery for the Private profile
Answer: A
Explanation:
By design Public profile as Sharing set to no and Private
profile set to Yes
But it Says "None of the computers can discover other computers
or devices, regardless of which
connection they use" so you need to review the full config.
