The APP version of NRN-522 study materials can save you traffic, When you buy our NRN-522 exam training materials, you will get a year of free updates, They **NRN-522 Online Bootcamps** are appreciated with passing rate up to 98 percent among the former customers.

Believe that users will get the most satisfactory answer after consultation.

NEW QUESTION: 1

You are building out a layer in a software stack on AWS that needs to be able to scale out to react to increased demand as fast as possible. You are running the code on EC2 instances in an Auto Scaling Group behind an ELB. Which application code deployment method should you use?

- A.** SSH into new instances that come online, and deploy new code onto the system by pulling it from an S3 bucket, which is populated by code that you refresh from source control on new pushes.
- B.** Create a new Auto Scaling Launch Configuration with UserData scripts configured to pull the latest code at all times.
- C.** Create a Dockerfile when preparing to deploy a new version to production and publish it to S3. Use UserData in the Auto Scaling Launch configuration to pull down the Dockerfile from S3 and run it when new instances launch.
- D.** Bake an AMI when deploying new versions of code, and use that AMI for the Auto Scaling Launch Configuration.

Answer: D

Answer: B

NEW QUESTION: 4

You are deploying an ASP.NET Core API application to an Azure App Services Docker container instance.

When customers access the application, secret keys are generated so that users can access to the data that they need. Security keys must expire after one hour. All key usage must be logged.

You need to store the customer secret keys.

Which storage option should you use?

NOTE: Each correct selection is worth one point.

- A. Azure Key Vault with key rotation and auditing
- B. Inside the Docker container using system logs for auditing
- C. Environment variables with an audit trail stored in Azure Blob Storage
- D. Encrypted in Azure SQL with a manual audit trail and a key rotation algorithm

Answer: A

Explanation:
