### **NEW QUESTION: 3**

When setting up order transaction types, which is the first setup step required?

**A.** Assign the order transaction type to the document sequence.

**B.** Assign line flows to the order transaction type

**C.** Create the line transactions type for return lines.

**D.** Create a document sequence for orders

**E.** Create the line transaction type for order lines.

**F.** Create the order transaction type

**Answer: E**

Explanation:

Explanation/Reference:

Before you can setup the 'order' level transaction types, you must first setup the 'line' level transaction types.

This is because when you setup the order level, you assign the line level flows.

### **NEW QUESTION: 4**

An organization plans to migrate to Office 365. You use the Windows Azure Active Directory (AD) Sync tool.

Several users will not migrate to Office 365. You must exclude these users from synchronization. All users must continue to authenticate against the on-premises Active Directory.

You need to synchronize the remaining users.

Which three actions should you perform? Each correct answer presents part of the solution.

**A.** Disable the user accounts in Active Directory.

**B.** Configure the connection filter.

**C.** Populate an attribute for each user account.

**D.** Perform a full synchronization.

**E.** Run the Windows PowerShell command `Set-MsolDirSyncEnabled -EnableDirSync $false`.

**Answer: B,C,D**
