## NEW QUESTION: 4

A. Option A

B. Option B

**Answer: B**

Explanation:

Explanation

You should modify the Name Server record, not the Name Servers.

Note: Before you can delegate your DNS zone to Azure DNS, you need to know the name servers for your zone. The NS record set contains the names of the Azure DNS name servers assigned to the zone.

In the registrar's DNS management page, edit the NS records and replace the NS records with the Azure DNS name servers.
