NEW QUESTION: 2
Sie müssen einen benutzerdefinierten Domännennamen für Azure
AD definieren, um die geplante Infrastruktur zu unterstützen.
Welchen Domainnamen sollten Sie verwenden?
A. ad.humongousinsurance.com
B. humongousinsurance.local
C. humongousinsurance.onmicrosoft.com
D. humongousinsurance.com
Answer: D
Explanation:
Explanation
Every Azure AD directory comes with an initial domain name in
the form of domainname.onmicrosoft.com.
The initial domain name cannot be changed or deleted, but you
can add your corporate domain name to Azure AD as well. For
example, your organization probably has other domain names used
to do business and users who sign in using your corporate
domain name. Adding custom domain names to Azure AD allows you
to assign user names in the directory that are familiar to your
users, such as '' instead of
' name.onmicrosoft.com'.
Scenario:
Network Infrastructure: Each office has a local data center
that contains all the servers for that office. Each office has
a dedicated connection to the Internet.
Humongous Insurance has a single-domain Active Directory forest
named humongousinsurance.com Planned Azure AD Infrastructure:
The on-premises Active Directory domain will be synchronized to
Azure AD.
