For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

**NEW QUESTION: 3**

Which feature enables LDAP support on the IBM DS8880 family?

- A. The isolated key server
- B. Data Protection license feature code
- C. Copy Services Manager
- D. LDAP proxy server

**Answer: C**

Explanation:

IBM Copy Services Manager (CSM) is a replication management solution that is based on the IBM Tivoli Productivity Center for Replication technology. CSM as installed on the HMC, or acquired separately, includes a lightweight build of the IBM WebSphere Liberty server code, to use to authenticate CSM users through a Lightweight Directory Access Protocol (LDAP). The same integrated LDAP support can be used for remote authentication of DS8000 users. Furthermore, if you simply want to take advantage of the CSM LDAP client for DS8000 LDAP authentication, the CSM license and CSM activation are not required.
