AWS assets are centrally managed through an inventory
management system that stores and tracks owner, location,
status, maintenance, and descriptive information for AWS-owned
assets. Following procurement, assets are scanned and tracked,
and assets undergoing maintenance are checked and monitored for
ownership, status, and resolution.

NEW QUESTION: 3
A company has a development environment and a production
environment. The production environment has several third-party
managed and unmanaged solutions that made changes to the
Contact main form.
You create a new solution in the development environment. You
add the Contact entity and the Contact main form to the
solution. You create a custom field on the Contact entity.
What happens when you perform these actions and import the
solution into the production environment? To answer, select the
appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:
Explanation:

Explanation

Box 1: The field is appended to the end of the existing
section.
When you add new elements to a form that is to be merged, we
recommend that you include your new elements within new
container elements (tabs or sections). Additions to any
container will be appended to the end of the container. For
example, fields added to a section will be positioned at the
end of the section.

Box 2: The field is added in a new section.
Box 3: The field is inserted in the middle of the existing section
