Answer: B,D

NEW QUESTION: 2
Your network contains an Active Directory domain named contoso.com.
You discover that when you join client computers to the domain manually, the computer accounts are created in the Computers

container.
You need to ensure that new computer accounts are created
automatically in an organizational unit (OU) named Corp.
Which tool should you use?
A. redircmp.exe
B. dsadd.exe
C. net.exe
D. regedit.exe
Answer: A
Explanation:
A. Used to stop/start protocols
B. Redirects the default container for newly created computers
to a specified, target organizational unit
C. Modify local registry entries
D. Adds specific types of objects to the directory
Redirects the default container for newly created computers to
a specified, target organizational unit (OU) so that newly
created computer objects are created in the specific target OU
instead of in CN=Computers.
You must run the redircmp command from an elevated command
prompt.
Redircmp.exe is located in the C:\Windows\System32 folder.
You must be a member of the Domain Admins group or the
Enterprise Admins group to use this tool.

NEW QUESTION: 3
You are developing an application. The application converts a
Location object to a string by using a method named
WriteObject.
The WriteObject() method accepts two parameters, a Location
object and an XmlObjectSerializer object.
The application includes the following code. (Line numbers are
included for reference only.)

You need to serialize the Location object as XML.
Which code segment should you insert at line 20?
A. new XmlSerializer(typeof(Location))
B. new DataContractSerializer(typeof(Location))
C. new DataContractJsonSerializer(typeof (Location))
D. new NetDataContractSerializer()
Answer: B
Explanation:
The code is using [DataContract] attribute here so need to use
DataContractSerializer class.
The DataContractJsonSerializer class serializes objects to the
JavaScript Object Notation (JSON) and deserializes JSON data to
objects.
Use the DataContractJsonSerializer class to serialize instances
of a type into a JSON document and to deserialize a JSON
document into an instance of a type.
