Explanation: Incorrect answer: BD

There are two basic techniques for encrypting information:

symmetric encryption (also called secret key encryption) and

asymmetric encryption (also called public key encryption.) in

symmetric key As long as both sender and recipient know the

secret key, they can encrypt and decrypt all messages that use

this key. A public key is made freely available to anyone who

might want to send you a message. A second, private key is kept

secret, so that only you know it.
