NEW QUESTION: 1
What could stop standard sync actions from occurring?
A. Connector is not verified or has become unverified
B. All of the above
C. A large sync queue
D. Salesforce API limit has been reached
Answer: B

NEW QUESTION: 2
The acronym CMM stands for:
A. Continuous Maturity Methods
B. Computer Methods and Models
C. Capability Maturity Model
D. Change Management Model
E. Continuous Maturity Model
Answer: C

NEW QUESTION: 3
For what reason would you configure multiple security contexts

on the ASA firewall?
A. To enable the use of multicast routing and QoS through the firewall.
B. To provide redundancy and high availability within the organization.
C. To separate different departments and business units.
D. To enable the use of VRFs on routers that are adjacently connected.
Answer: C
Explanation:
You can partition a single ASA into multiple virtual devices, known as security contexts. Each context is an independent device, with its own security policy, interfaces, and administrators. Multiple contexts are similar to having multiple standalone devices.
Common Uses for Security Contexts
+ You are a service provider and want to sell security services to many customers. By enabling multiple security contexts on the ASA, you can implement a cost-effective, space-saving solution that keeps all customer traffic separate and secure, and also eases configuration.
+ You are a large enterprise or a college campus and want to keep departments completely separate.
+ You are an enterprise that wants to provide distinct security policies to different departments.
+ You have any network that requires more than one ASA.
