Answer:

Explanation:

See solution below.

Explanation

Step 1: In the Azure portal, click All services. In the list of resources, type Storage Accounts. As you begin typing, the list filters based on your input. Select Storage Accounts.

Step 2: On the Storage Accounts window that appears, choose Add.

Step 3: Select the subscription in which to create the storage account.

Step 4: Under the Resource group field, select Create New. Create a new Resource

Step 5: Enter a name for your storage account:
corpdata8548984n2

Step 6: For Account kind select: General-purpose v2 accounts

(recommended for most scenarios) General-purpose v2 accounts is recommended for most scenarios. General-purpose v2 accounts deliver the lowest per-gigabyte capacity prices for Azure Storage, as well as industry-competitive transaction prices. Step 7: For replication select: Read-access geo-redundant storage (RA-GRS) Read-access geo-redundant storage (RA-GRS) maximizes availability for your storage account. RA-GRS provides read-only access to the data in the secondary location, in addition to geo-replication across two regions.

NEW QUESTION: 2

You need to modify the Password Replication Policy on a read-only domain controller (RODC).

Which tool should you use?

To answer, select the appropriate tool in the answer area.

Point and Shoot:

Answer:

Explanation:

Explanation:

To configure the PRP using Active Directory Users and Computers 1. Open Active Directory Users and Computers as a member of the Domain Admins group.

2. Ensure that you are connected to a writeable domain controller running Windows Server 2008 in the correct domain. (...)
