NEW QUESTION: 1
In performing a risk assessment on the impact of losing a server, the value of the server should be calculated using the:
A. cost to obtain a replacement.
B. annualized loss expectancy (ALE).
C. cost of the software stored.
D. original cost to acquire.
Answer: A
Explanation:
The value of the server should be based on its cost of replacement. The original cost may be significantly different from the current cost and, therefore, not as relevant. The value of the software is not at issue because it can be restored from backup media. The ALE for all risks related to the server does not represent the server's value.

NEW QUESTION: 2
HOTSPOT
You have a SharePoint server 2013 server farm.
Users report that the past week, some pages were slow to render.
You need to identify the 10 pages in the farm that take the longest to load.
