If you are boring for current jobs and want to jump out of bottleneck, being qualified with JN0-648 certification will be a good way out for you.

**NEW QUESTION: 1**

Which layer of the TCP/IP stack combines the OSI model physical and data link layers?

- A. application layer
- B. transport layer
- C. Internet layer
- D. network access layer

**Answer: D**

Explanation:

The Internet Protocol Suite, TCP/IP, is a suite of protocols used for communication over the internet. The TCP/ IP model was created after the OSI 7 layer model for two major reasons. First, the foundation of the Internet was built using the TCP/IP suite and through the spread of the World Wide Web and Internet, TCP/IP has been preferred. Second, a project researched by the Department of Defense (DOD) consisted of creating the TCP/IP protocols. The DOD's goal was to bring international standards which could not be met by the OSI model. Since the DOD was the largest software consumer and they preferred the TCP/IP suite, most vendors used this model rather than the OSI. Below is a side by side comparison of the TCP/IP

and OSI models.

**NEW QUESTION: 2**

Ein Projektmanager hat Schwierigkeiten, Ressourcen für ein neues Projekt zu erhalten. Die verfügbaren Ressourcen anderer Abteilungen zeigen wenig Interesse an dem Projekt.
